increased their regular lower-middle and lower-class clientele by gaining reputations for making such accommodations.

Commercial centers—day spas and health resorts—are frequented by exclusively upper-middle class, upper class, and foreign clientele. These are well-educated people who are generally employed in well-paying professions such as business, fashion, acting, or art. They are likely to have seen one of the self-help books I described earlier, or at least an article on a self-help guru in a magazine or newspaper before coming for treatment. Many of them are from different cities, coming for a relaxation and rejuvenation vacation break. Many want help for chronic problems such as back pain, obesity, and constipation, as well as the break from the “fast life,” hence the visit specifically to a “health”

ĀYURVEDA

Āyurveda, the Vedic system of medicine, views health as harmony between body, mind, and spirit. Its two most famous texts belong to the schools of Charaka and Sushruta. According to Charaka, health and disease are not predetermined, and life may be prolonged by human effort. Sushruta defines the purpose of medicine as curing the diseases of the sick, protecting the healthy, and prolonging life. The beginnings of medicine may be traced to the Rig Veda, since it speaks of the bhishaj, or physician, in connection with setting a broken bone. From other references the bhishaj or vaidya emerges as a healer of disease and an expert in herbs. The twin gods Āśvins are particularly associated with the healing of blindness, lameness, and leprosy. Soma is another healing deity.

According to the Charaka tradition, there existed six schools of medicine, founded by the disciples of the sage Punarvasu Ātreya. Each of these disciples—Agnivesha, Bhela, Jatukarna, Parāshara, Harita, and Kshārapani—composed a Samhitā. Of these, the one composed by Agnivesha was supposed to be the best. The Agnivesha Samhitā was later revised by Charaka, and it came to be known as Charaka Samhitā. Āyurveda is traditionally divided into eight branches which, in Charaka's scheme, are: sāttāra-sthāna, general principles; nidāna-sthāna, pathology; vināśa-sthāna, diagnostics; sharira-sthāna, physiology and anatomy; mārdiya-sthāna, prognosis; chikitsā-sthāna, therapeutics; kalpa-sthāna, pharmacetics; and siddhi-sthāna, successful treatment.

The IUD does not protect against sexually transmitted diseases (STDs). If a girl gets an IUD put in at the same time she has an infection, it could lead to pelvic inflammatory disease (PID). Abstinence (not having sex) is the only method that always prevents pregnancy and STDs.

About the IUD - KidsHealth
Abstinence-Only Education Is Ineffective And Unethical, Report Argues

August 23, 2017 - 4:38 PM ET

SARAH MCCAMMON
Abstaining from sexual activity is a surefire way to prevent pregnancy and avoid sexually transmitted diseases. But programs advocating abstinence often fail to prevent young people from having sex, researchers write in the September issue of the *Journal of Adolescent Health*.  

Such programs, sometimes referred to as "abstinence only until marriage" programs, typically advocate monogamous, heterosexual marriage as the only appropriate context for sexual intercourse and as the only certain way to avoid unwanted pregnancies and sexually transmitted diseases.  

That's "not just unrealistic, but it leaves our young people without the information and skills that they need," said Laura Lindberg, a coauthor of the report and a research scientist at the Guttmacher Institute, a reproductive health research group that supports abortion rights. "We fail our young people when we don't provide them with complete and medically accurate information."  

The analysis confirms previous public health findings that abstinence-only education programs don't succeed in reducing rates of teen pregnancies or STDs. Moreover, public health data indicate that such programs "have little demonstrated efficacy in helping adolescents to delay intercourse," the authors write.  

When American teens do begin having sex, they may fail to use condoms or other forms of contraception, unlike their peers in other countries who have routine access to contraceptive education and counseling, the report suggests.  

Promoting abstinence until marriage as the only legitimate option for young people

UNWANTED INTIMACY

Violent Sexual Transfers in British and American Societies 1870s to 1970s

Perpetrators of unwanted sexual intimacies assault our histories. Their violence is historically specific and, as such, alters form through time. This article examines the sexual choices as interpreted in the past. Whether understood as an inheritance from the evolutionary past, evidence of a distributed facilitator, or proof of a perverse situational adaptation, the great clash between competing visions of what it means to be human exposed to the accommodation of sexual violence within British and American societies in the nineteenth and twentieth centuries.

Keywords: rape, violence, science, criminology.

Introduction

Violence is at the heart of intimacy. Even within the dusty confines of the archive, where historians seek out their basic texts, there is always that confrontation with subjectivities under threat of being engulfed. When the historian spills the contents of life, she is not only revealing but also altering. In the following pages, I will look at how the dominant paradigms of sexual violence have been shaped and remade by the very act of being subjected to them.

Trump’s Onetime Physician Says Trump Aides Raided His Office, Describing a Year of ‘Torture’

The New York Times
May 1, 2018 Tuesday 03:22 EST

WASHINGTON — President Trump’s longtime physician said in an interview published Tuesday that after he told The New York Times that Mr. Trump took a drug to promote hair growth, two Trump aides staged what he called “a raid” of his Manhattan office in February 2017 and removed all of Mr. Trump’s medical files.

Dr. Harold N. Bornstein, who served as Mr. Trump’s personal doctor for 36 years, told NBC News that the roughly half-hour encounter left him feeling “raped, frightened and sad.” He said that since the president’s bodyguard, Keith Schiller, accompanied by a lawyer for the Trump Organization, the office was locked, he was not present and the drug was removed.
